

# MECHANICAL ENGINEERING IN Washington DC

## Internship sites

There is a vast field of internships for Mechanical Engineering students. Some of these internships include

- US Naval Observatory
- NASA
- SAIC

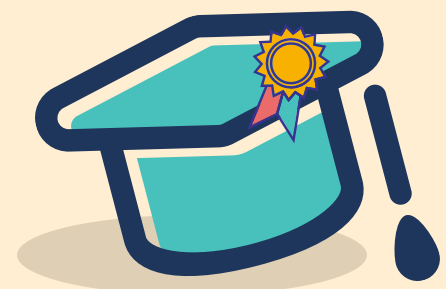

## Things to do

- Field-trip to Congress
- Attend a Monday Night Forum
- Visit New York, Boston, Gettysburg, Philadelphia
- Network with high officials
- Tour embassies in D.C.
- "Get coffee" with D.C. professionals
- Tour graduate and law schools

## Classes to take

More info on classes link: [UCDC Courses](#)

- General Research
- International Policy
- U.S. Supreme Court
- Washington Media
- Congress and Politics in Washington
- American Political Journalism
- Campaigns and Elections
- Lobbying Money & Influence in DC
- Politics & Poems (Spring semester)

## Contact your advisor

Be sure to contact your advisor for any questions you may have. A good resource is the following link:

## Welcome to UCDC

The graduate emphasis in Mechanical Engineering at UC Merced is dedicated to the education of a new generation of mechanicians and researchers in areas related to mechanical engineering who aim to master the fundamentals of the mechanical sciences — which include disciplines such as continuum mechanics, fluid mechanics, heat and mass transfer, and energy conversion — while being exposed to state-of-the-art research techniques, methodologies and equipment to solve problems that are relevant to modern society like green energy, mechanical modeling and synthesis, robotics and mechatronics, control systems, and more.
